★★★★★

Personal guidance and the option to have things customised!

PROS

The app, the service, the price... They constantly strive to make the reservation system better and more convenient.

CONS

I thought about this question for a long time but couldn't find a suitable answer. I'm really sorry, but we are Happy Chefs.

★★★★★

I can only recommend HappyChef: it offers top service to hospitality entrepreneurs, at a much lower price than the big players on the market.

The fact that this is a small company means top service and follow-up. I should actually have used HappyChef much earlier, but I'm so glad I'm using it now.

PROS

The biggest advantage for me was the time saved, fewer emails and phone calls to answer. Everything now runs almost automatically, which gives me a huge amount of time to focus on other things that matter for our business.

CONS

So far I haven't experienced any drawbacks with HappyChef. The software is user-friendly, and contact and service run super smoothly.

Mathias Van den Hauwe

Trend Neuf · Watervliet

HappyChef

Probably the best reservation system on the market in terms of value for money.

Easy to implement. Easy to use. Glad we could connect this to our website. We received positive reactions from our customers.

PROS

User-friendly and effective reservation system for restaurants. Fully operational within the hour, without a single hitch. Unlimited reservations at a fair monthly price.

CONS

No problems found. Everything runs smoothly.

★★★★★

After our less positive experience with Zenchef we switched to Happy Chef, and what a relief!

Happy Chef is a young, dynamic company where quality, customer focus and personal service are clearly central. You feel there are people behind it who are truly involved with their customers and think along with their business.

What particularly appeals to us is the honest and transparent pricing model and an accessible customer service: you invest in a solid reservation program for a one-time purchase price, without expensive yearly recurring subscription costs.

The service is excellent, communication runs smoothly and you notice that customer satisfaction is no empty promise here.

A special thank you to Thibault, who took the time to tailor the platform completely to our specific needs. That personal approach really makes the difference!

A switch we haven't regretted for a second. On the contrary!

An absolute recommendation for every hospitality entrepreneur looking for a quality reservation system with excellent service and a fair price. Keep it up, Happy Chef! You're doing great!

Extremely user-friendly, everything you look for in a reservation platform, made as simple as possible. TOP.

And on top of that first-class customer service. Recommended to all.

In a world where everything just gets more expensive, and subscription costs are sky-high, HappyChef is there for the self-employed who want to keep doing their passionate work.

We have been digitally present since 2006 with a reservation tool at the Greek fries shop O Geros. Since this year we have switched to HappyChef. HappyChef is user-friendly, has a very good price, and a friendly and approachable team.

From the start we were very well helped.

As a starting hospitality business in Damme, where we run both a restaurant and a hotel, we were looking for one system that could combine everything. That's how we ended up with Thibault from HappyChef, who also offers HappyHotel.

The app is user-friendly and the big advantage is that you can make a lot of adjustments yourself, without having to contact someone each time. The automatic WhatsApp messages to customers are also a nice extra. That way guests immediately receive the right information.

If you have a question, a remark or get stuck somewhere, Thibault is always easy to reach. He thinks along and does everything to help you as quickly as possible. We could even count on him for other IT questions.

We are very satisfied with the collaboration and can definitely recommend HappyChef and HappyHotel.

★★★★★

Very satisfied with HappyChef!

We use HappyChef for our restaurant and are super satisfied. The service is fast, professional and whenever we have questions we are always helped quickly and well. Everything works nicely and they really think along with us. A real recommendation for other hospitality businesses!

★★★★★

Where time used to go into answering phone calls and emails, I now hardly have to do that anymore.

Super user-friendly, for us personally as a business this saves me a lot of phone calls and we should have used this a few years earlier. Reservations are easy to make and as a manager I save an enormous amount of time.
